WELCOME to the

Project Management Workshop

LAND ACKNOWLEDGEMENT

"We wish to acknowledge this land on which the University of Toronto operates. For thousands of years it has been the traditional land of the Huron-Wendat, the Seneca, and most recently, the Mississaugas of the Credit River. Today, this meeting place is still the home to many Indigenous people from across Turtle Island and we are grateful to have the opportunity to work on this land."

to produce

What is CECA?

Multi-Disciplinary Design Team

- Provide workshops on sustainable building energy
- Participate in Green Energy
 Challenge (design competition)
- Provide **networking opportunities** with industry professionals
- Provide opportunity to use softwares to help audit and evaluate building performance

OUTLINE

- 1. Project Management Basics
- 2. Scheduling
- 3. Cash Flow
 - a. Costs
 - b. Financing
 - c. Payback Period

The Basics

What is project management?

- Time 💯
- Money 💸
- Leadership ✓

Why is it important?

- Utilize it in your classes
- Skills applicable to all fields

What tools do I need?

- EXCEL!!! And MS Project
- Communication and Leadership Skills

Scheduling

Building a Gantt Chart:

- Split up project into tasks
- 2. Determine the **order** and **length** of tasks Do certain tasks require other tasks to be completed? Can the task only be completed at certain times?

3. Optimize!

Can some tasks be done at the same time?

Task Name	Q12019			Q2 2019	Q3 2019		
lask name	Jan 19	Feb 19	Mar 19	Apr 19	Jun 19	Jul 19	
Planning							
Research							
Design							
Implementation							
Follow up							

0	Task	Task Name	'09	Oct 11	I I -		'09 (Oct 18	'09	Oct 25	'09 Nov 01		'09	Nov 08

Cost Estimation 🚿

- Direct Costs
- Indirect & Maintenance Costs

Financing 💰

- Rebates and Incentives
- Loans

Final Cash Flow

- Cash Flow Opportunity Calc.
- Combining Costs and Financing
- Payback Period

"This is money—get ready to worry about it for the rest of your life."

Direct Costs

- Direct 🏫 or Indirect 🔨
- Estimation [\$] = quantity [#] * unit cost [\$/#]

Labor 👷

- Need to know: hourly wage [\$/hr] & productivity [#/hr]
- Estimation [\$] = <u>quantity [#]</u> * hourly wage [\$/hr] productivity [#/hr]

Indirect & Maintenance Costs

Indirect Costs:

- Overhead and profit
- Insurance and liability
- Inspections
- Tax

- Contingency
- Labor escalation
- Material delivery and handling

Maintenance Costs:

- Inspection
- Cleaning

Financing

Rebates & Incentives O Cost deduction!

2. Loans

- 3. Building's Budget
 - Small but may be used for general operations

Cash Flow Opportunity Calculator

A tool made by Energy Star that allows you to estimate how much new equipment you can finance using the anticipated energy savings from your project. We use it for the GEC!

Now let's take a walk through... Find the excel spreadsheet <u>here</u>.

ENERGY STAR

https://www.energystar.gov/CFOcalculator

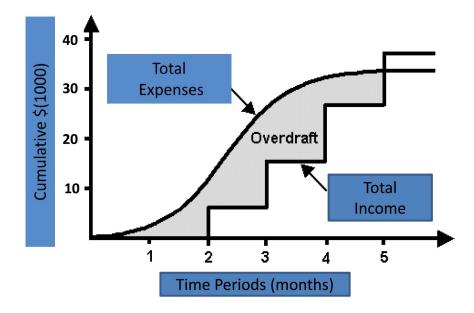

Final Cash Flow

Building a Cash Flow Diagram:

- Find your total cost, any costs that may be recurring, and any costs that may increase in the future
- 2. Determine your financing and thus how you will pay off the cost over time (**hint:** use the cash flow opportunity calculator!)
- 3. Input into excel :)

Payback Period

= <u>amount invested (P)</u> annual savings

Leadership
